SKILLS

Frontend: React-Native • Kotlin • React.js • Next.js • Native-Android • Native-iOS

Backend: Node.js • Express • Java • SpringBoot

Databases: MySQL • MongoDB

EXPERIENCE

Application Development Engineer • Weingenious Technocrats

April 2024 - Present

Developed multiple apps using React-Native for Android and iOS, including these:-

KVSC (Jain Community Management App)

- Singlehandedly designed an **in-app business/e-commerce** listing feature where members can register their stores or services, exposing details and enabling direct engagement via WhatsApp contact actions.
- Led a team of designers and backend engineers to translate UI/UX flows for **60+ responsive React Native screens**, integrating REST APIs, handling edge cases, and maintaining consistency across the application.
- Build **in-app notification system** for 15k users using **Firebase console** with personalized notifications.
- Implemented a **dynamic community news module** to publish and consume daily updates, enabling members to stay informed about **events, announcements**, and activities in a centralized feed.

Hirexpert (Job-Matching App)

- Developed a schema for leveraging complex fields like tech stack, location, experience, and salary preferences and implemented a **rules-based recommendation engine** to surface relevant roles to more than 1k candidates and suitable profiles to employers.
- Integrated **PhonePe payment gateway** and also crafted a **credit-based monetization system**, allowing companies to purchase credits and unlock candidate contact details and resumes in a controlled, trackable manner.
- Built real-time **in-app messaging** between candidates and companies using **socket-based real-time communication**, directly reducing time-to-hire through instant conversations by 50%.

Kohira (Jewellery E-Commerce App)

- Implemented **advanced product browsing** with search and filters across metals, stamp, shape, and collections, enabling users to quickly locate relevant jewellery items among 100k+ products.
- Built 5+ core e-commerce features, including product discovery, add-to-cart, wishlist management, address selection, and home-delivery checkout experience, ensuring a smooth and intuitive purchasing journey.
- Integrated **PhonePe payment gateway** for secure online transactions and also added a custom jewellery request flow which allows users to submit requirements directly from the app, reducing checkout time by 25%.

Application Developer • Om InfoWave

June 2023 - March 2024

Developed multiple apps using Native Android (Kotlin) and React-Native, including this one:-

Cheers! (Social Media App)

- Developed app using Native Android with **Kotlin**, handling complete UI design and seamless API integration to deliver **media sharing functionality** and responsive user experiences.
- Designed 20+ intuitive screens and **integrated RESTful APIs** for data fetching, ensuring robust error handling, optimal performance across diverse Android devices.

EDUCATION

Full Stack Web Development Course - **Masai School**

B.E(Electrical Engineering) - B.H. Gardi College of Engineering and Technology

Certificate

7.25 CGPA
